

Virginia Title V Operating Permit

Until such time as this permit is reopened and revised, modified, revoked, terminated or expires, the permittee is authorized to operate in accordance with the terms and conditions contained herein. This permit is issued under the authority of Title 10.1, Chapter 13, §10.1-1322 of the Air Pollution Control Law of Virginia. This permit is issued consistent with the Administrative Process Act, and 9 VAC 5-80-50 through 9 VAC 5-80-300 of the State Air Pollution Control Board Regulations for the Control and Abatement of Air Pollution of the Commonwealth of Virginia.

Authorization to operate a Stationary Source of Air Pollution as described in this permit is hereby granted to:

Permittee Name:	USA Waste of Virginia Landfills, Inc.
Facility Name:	Bethel Landfill
Facility Location:	0.1 mile W of Bethel Rd. and N of I 64 City of Hampton, Virginia
Registration Number:	61291
Permit Number:	VA-61291

April 28, 2003
Effective Date

April 28, 2008
Expiration Date

(for)
Robert G. Burnley
Director, Department of Environmental Quality

I. Facility Information

Permittee

USA Waste of Virginia Landfills, Inc.
100 North Park Lane
Hampton, Virginia 23666

Responsible Official

Robert Kania
Area Vice President
757-558-6111

Facility

The Bethel Landfill
0.1 mile West of Bethel Road, north of I-64
Hampton, Virginia 23669

Contact Person

Charles Plott
Site Manager
757-766-3033

AFS Identification Number: 51-650-00093

Facility Description: SIC Code 4593/4911 – Municipal solid waste landfill.

II. Emission Units

Equipment to be operated consists of:

Emission Unit ID	Stack ID	Emission Unit Description	Size/Rated Capacity*	Pollution Control Device (PCD) Description	PCD ID	Pollutant Controlled	Applicable Permit Date
Fuel Burning Equipment							
P001	V001	Enclosed Flare	12'D x 40'H	Controls NMOC's	P001	NMOC's	July 17, 2001
P001A	V002	Open (candle) Flare	1.5'D x 22'H	Controls NMOC's	P001A	NMOC's	July 17, 2001
B001	V003	Leachate vaporator	4.2 mmBtu/Hr	Controls NMOC's	B001	NMOC's	July 17, 2001
F001	F001	LFG-fueled engine/generator	95 KW-135BHP	Unit controls NMOC's	F001	NMOC's	July 17, 2001
Liquid Storage Tanks							
P003	N/A	Diesel Fuel Storage Tank	10,000 gallons	none	N/A	VOC	none
P009	N/A	Leachate Storage Tank	120,000 gallons	none	N/A	VOC	none
Process: Landfill Operations							
LFO-1	LFO-1	Landfill Operations, including a Landfill Gas Collection and Control System	49.5 x 10 ⁶ m ³	GCCS	NA	NMOC's	July 17, 2001

*The Size/Rated capacity [and PCD efficiency] is provided for informational purposes only, and is not an applicable requirement.

III. Landfill Operations and Fuel Burning Equipment Requirements – (emission unit ID# P001, P001A, B001 and F001)

A. Limitations

1. **The GCCS System** - The permittee shall operate an active collection and control system, approved by the Administrator that captures the gas generated within the landfill. The GCCS installed at the Bethel Landfill shall be certified under 40 CFR 60.752 (b)(2)(ii)(A). The active collection system shall be designed to handle the maximum expected gas flow rate from the entire area of the landfill that warrants control over the intended use period of the gas control or treatment system equipment. The system shall collect gas from each cell in the landfill in which solid waste has been placed for a period of 5 years or more if active or 2 years or more if closed or at final grade. The system shall collect gas at a sufficient extraction rate to meet all operational requirements. Also, the system shall be designed to minimize the off-site migration of subsurface gas. Based on the USA Waste Title V application, NMOC generation rates as of January 21, 1998 are calculated as more than 50 megagrams. Therefore, it is the responsibility of USA Waste to submit an updated design plan for the GCCS whenever changes or additions are made to the Gas Collection System. (9 VAC 5-80-110, 40 CFR 60.752 (b)(2)(ii)(A) and 40 CFR 60.753(a))
2. **NMOC Controls and Efficiency** - The collection system shall route all collected gas to the control system where it is combusted by P001, P001A, B001 and F001. P001A shall be designed and operated in accordance with 40 CFR 60.18. The primary control device is the enclosed flare, P001 which shall achieve a control efficiency, by stack test of not less than 98 percent, on a mass basis or reduce C_{NMOC} to 20 ppm or less, dry basis as hexane at three percent oxygen. (9 VAC 5-80-110, 40 CFR 60.752 (b)(2)(iii), 40 CFR 60.756(b)(1) and Condition 5 of State Operating Permit issued July 17, 2001)
3. **GCCS Operation** – The primary purpose of the GCCS is to control the migration of methane gas. The permittee shall operate the collection system such that the surface methane concentration is less than 500 ppm above the background level at the surface of the landfill. A negative pressure shall be maintained at each active wellhead except in case of fire or increased well temperature. The permittee shall operate each interior, active wellhead in the collection system such that the gas temperature is less than 55 degrees C and with either nitrogen level less than 20% or an oxygen level less than 5%. (9 VAC 5-80-110, 40 CFR 60.753(b), (c) & (d))
4. **Operating Parameters** – The provisions for oxygen, nitrogen, temperature, pressure and surface methane concentrations shall apply at all times except during periods of start up, shut down, or malfunction, provided that the duration of start up, shut down, or malfunction does not exceed 5 days for collection systems and does not exceed 1 hour for treatment or control devices. (9 VAC 5-80-110 and 40 CFR 60.755(e))

5. **GCCS Shut down** - The permittee shall operate the GCCS system such that all collected gas is routed to the enclosed flare. In the event that the collection and control system malfunctions, the GCCS gas moving equipment shall be shut down and all vents to the atmosphere shall be closed within 1 hour.
(9 VAC 5-80-110 and 40 CFR 60.753(e))
6. **Operational Integrity** – The permittee shall operate the control system so that the gas is combusted and the NMOC's are controlled primarily by (1.) the enclosed flare, P001 and secondarily by (2.) the candle flare, P001A. During normal operations, all of the gas collected by the GCCS shall be controlled.
(9 VAC 5-80-110 and 40 CFR 60.753(f))
7. **Placement of New Wells** – The permittee shall place each well or design component as specified in the GCCS design plan and shall install wells no later than 60 days after the date on which the initial solid waste has been in place in any cell or group of cells for a period of 5 years or more if active or 2 years or more if closed or at final grade.
(9 VAC 5-80-110 and 40 CFR 60.755(b))
8. **NSPS Subpart WWW** – The municipal solid waste landfill, as well as the GCCS shall be constructed and operated in accordance with 40 CFR 60 Subpart WWW. When 'The Administrator' is prescribed as the recipient of reports required by this Subpart, it shall be understood to be the EPA Administrator.
(9 VAC 5-80-110 and 40 CFR 60.750 through 40 CFR 60.759)
9. **Approved Fuels** - The approved fuel for the flares, vaporator and engine is landfill gas. Propane fuel shall be used as necessary to ignite the flare devices. No other fuel is authorized in conjunction with the operation of the GCCS. Any request to add a new fuel or a new fuel-burning device may require a new permit.
(9 VAC 5-80-110 and Condition #10 of State Operating Permit issued July 17, 2001)
10. **Throughput Limit** - The GCCS control system shall consume no more than 2.32×10^9 cubic feet, dry basis of landfill gas per year at standard atmospheric conditions (68 °F and 14.7 psi), calculated monthly as the sum of each consecutive 12 month period.
(9 VAC 5-80-110 and Condition #9 of State Operating Permit issued July 17, 2001)
11. **Primary Flare Emissions** - Emissions from the operation of the enclosed flare shall not exceed the limits specified below:

Nitrogen Oxides (as NO ₂)	12.9 lbs/hr	58.6 tons/yr
Carbon Monoxide	19.6 lbs/hr	87.8 tons/yr
Sulfur Dioxide	3.2 lbs/hr	13.7 tons/yr
NMOC's	3.5 lbs/hr	22.8 tons/yr

These emissions are derived from the estimated overall emission contributions from operating limits. Exceedance of the operating limits shall be considered credible evidence of the exceedance of emission limits. Compliance with these emission limits may be determined as stated in Condition number III.A.10.
(9 VAC 5-80-110 and Condition 12 of State Operating Permit issued July 17, 2001)

12. Engine Emissions - Emissions from the operation of the engine shall not exceed the limits specified below:

Nitrogen Oxides (as NO ₂)	3.4 tons/yr
Carbon Monoxide	5.0 tons/yr
NMOC's	0.5 tons/yr

These emissions are derived from the estimated overall emission contributions from operating limits. Exceedance of the operating limits shall be considered credible evidence of the exceedance of emission limits. Compliance with these emission limits may be determined as stated in Condition number III.A.10.
(9 VAC 5-80-110 and Condition 13 of State Operating Permit issued July 17, 2001)

13. Vaporator Emissions - Emissions from the operation of the vaporator shall not exceed the limits specified below:

Nitrogen Oxides (as NO ₂)	1.5 tons/yr
Carbon Monoxide	7.0 tons/yr
Sulfur Dioxide	1.9 tons/yr
NMOC's	0.7 tons/yr

These emissions are derived from the estimated overall emission contributions from operating limits. Exceedance of the operating limits shall be considered credible evidence of the exceedance of emission limits. Compliance with these emission limits may be determined as stated in Condition number III.A.10.
(9 VAC 5-80-110 and Condition 14 of State Operating Permit issued July 17, 2001)

14. Plantwide Emissions - Emissions from the operation of the Landfill Gas fuel burning equipment shall not exceed the limits specified below:

Nitrogen Oxides (as NO ₂)	63.5 tons/yr
Carbon Monoxide	99.8 tons/yr
Sulfur Dioxide	15.6 tons/yr
NMOC's	24.0 tons/yr

These emissions are derived from the estimated overall emission contributions from operating limits. Exceedance of the operating limits shall be considered credible evidence of the exceedance of emission limits. Compliance with these emission limits may be determined as stated in Condition number III.A.10.

(9 VAC 5-80-110 and Condition 11 of State Operating Permit issued July 17, 2001)

15. **Visible Emission Limit** – Visible emissions from the fuel burning equipment, not to include the open flare, shall not exceed 10 percent opacity except during one six-minute period in any hour in which visible emissions shall not exceed 20 percent opacity as determined by EPA Method 9 (40 CFR 60 Appendix A). This condition applies at all times except during startup, shutdown and malfunction.

(9 VAC 5-50-80, 9 VAC 5-80-110 and Condition 15 of State Operating Permit issued July 17, 2001)

16. The open flare P001A, when it is being utilized shall be operated with no visible emissions as determined by EPA method 22 except for periods not to exceed a total of 5 minutes during 2 consecutive hours. This condition applies at all times except during startup, shutdown, and malfunction.

(9 VAC 5-80-110 and 40 CFR 60.18)

17. Combustion equipment emissions shall be controlled by proper operation and maintenance. Equipment operators shall be trained in the proper operation of all such equipment. Training shall consist of a review and familiarization of the manufacturer's operating instructions, at minimum.

(9 VAC 5-80-110)

B. Monitoring

1. **Well Pressure** - The permittee shall measure gauge pressure in the header at each individual active well monthly. If a positive pressure exists, action shall be initiated to correct the exceedance within 5 calendar days. If a negative pressure cannot be achieved without excess air infiltration within 15 calendar days of the first measurement, the system shall be expanded within 120 days of the initial measurement of positive pressure. Exceptions to this requirement are listed under 40 CFR 60.753(b)(1)-(b)(3).

(9 VAC 5-80-110 and 40 CFR 60.755(a)(3))

2. **Well Parameters** - The permittee shall monitor each active well monthly for temperature and nitrogen or oxygen. If a well exceeds one of these operating parameters, action shall be initiated to correct the exceedance within 5 calendar days. If correction of the exceedance cannot be achieved within 15 calendar days of the first measurement, the gas collection system shall be expanded to correct the exceedance within 120 days of the initial exceedance.

(9 VAC 5-80-110 and 40 CFR 60.755(a)(5))

3. **Surface Monitoring** - The permittee shall monitor surface concentrations of methane along the entire perimeter of the collection area and along a pattern that traverses the landfill at 30 meter intervals for each collection area for which waste has been in place for two or more years if closed or at final grade or for which waste has been in place for five or more years if active. This surface methane monitoring shall take place on a quarterly basis and using an organic vapor analyzer, flame ionization detector or other portable monitor meeting the specifications provided in paragraph (d) of 40 CFR 60.755. Areas with steep slopes, the active working face or other dangerous areas have been excluded from this monitoring after receiving approval from the Director, Tidewater Regional Office.
(9 VAC 5-80-110 and 40 CFR 60.755(c)(1))
4. **Surface Monitoring** – The background concentration of methane during surface emissions monitoring shall be determined for the instrument measuring the surface concentrations of methane by moving the probe inlet upwind and downwind outside the boundary of the landfill at a distance of at least 30 meters from the perimeter wells. Surface emission monitoring shall be performed in accordance with 40 CFR 60 Appendix A, Method 21, Section 4.3.1, except that the probe inlet shall be placed within 5 to 10 centimeters of the ground. Monitoring shall be performed during typical meteorological conditions.
(9 VAC 5-80-110 and 40 CFR 60.755(c)(2) and (c)(3))
5. **Surface Monitoring Method of Operation** – The portable analyzer used to determine the surface methane concentration shall meet the instrument specifications provided in 40 CFR 60, Appendix A, Method 21, Section 3, except that methane shall replace all references to VOC. The calibration gas shall be methane, diluted to a nominal concentration of 500 ppm in air. To meet the performance evaluation requirements in section 3.1.3 of Method 21, the instrument evaluation procedures of Section 4.4 of Method 21, of Appendix A shall be used. The calibration procedures in Section 4.2 of Method 21 shall be followed immediately before commencing a surface monitoring survey.
(9 VAC 5-80-110 and 40 CFR 60.755(d))
6. **Exceedances** – Any reading of surface methane of 500 ppm or more above background at any location shall be recorded as a monitored exceedance and the actions specified below shall be taken. As long as the specified actions are taken, the exceedance is not a violation of the operational requirements.
 - a. The location of the exceedance shall be marked and recorded.
 - b. The permittee shall perform cover maintenance or make adjustments to the vacuum of the adjacent wells to increase the gas collection in the vicinity of the exceedance. The location shall be remonitored within 10 calendar days of detecting the exceedance.

- c. If the remonitoring of the location shows a second exceedance, the permittee shall take additional corrective action and shall monitor the location again within 10 days of the second exceedance. If the remonitoring shows a third exceedance for the location, the permittee shall install a new well or other collection device within 120 calendar days after the initial exceedance.
 - d. Any location that initially showed an exceedance but has methane concentration less than 500 ppm above background at the 10-day remonitoring shall be remonitored 1 month from the initial exceedance. If the 1 month remonitoring shows a concentration less than 500 ppm above background, no further monitoring of that location is required until the next quarterly monitoring. If the 1-month remonitoring shows an exceedance, the permittee shall repeat the requirements of either paragraph (c) or (e) of this condition.
 - e. For any location where the monitored methane concentration equals or exceeds 500 ppm above background 3 times within a quarterly period, a new well or other collection device shall be installed within 120 calendar days of the initial exceedance. An alternative remedy to the exceedance, such as upgrading the blower, header pipes, or control devices, and a corresponding timeline for installation may be submitted to the Director, Tidewater Regional Office and the Administrator.
- (9 VAC 5-80-110 and 40 CFR 60.755(c)(4)(i) through 60.755(c)(4)(v))
- 7. **Cover Integrity** - The permittee shall implement a program to monitor for cover integrity and accomplish cover repairs as necessary on a monthly basis.
(9 VAC 5-80-110 and 40 CFR 60.755(c)(5))
 - 8. **Sampling Ports** - The permittee shall install a sampling port and a port for temperature measurements at each wellhead. The permittee shall measure the gauge pressure in the gas collection header on a monthly schedule. The permittee shall monitor nitrogen or oxygen concentration in the landfill gas on a monthly schedule. The permittee shall monitor temperature of the landfill gas on a monthly schedule.
(9 VAC 5-80-110 and 40 CFR 60.756(a))
 - 9. **Monitoring Devices** - The GCCS shall be equipped with a gas flow rate-measuring device that shall record the flow to the enclosed flare P001 at least every 15 minutes (40 CFR 60.756 (b)(2)(i)). The enclosed flare shall be equipped with a temperature-monitoring device equipped with a continuous recorder and having a minimum accuracy of +/- 1 percent of the temperature being measured, expressed in degrees Celsius or +/- 0.5 degrees Celsius, whichever is greater.

Each monitoring device shall be installed, maintained, calibrated and operated in accordance with approved procedures which shall include, as a minimum, the manufacturer's written requirements or recommendations. Each monitoring device shall be provided with adequate access for inspection and shall be in operation when the GCCS is operating. Any periods of malfunction of these monitoring devices shall be recorded as defined in Condition III.C.8.

(9 VAC 5-80-110, 9 VAC 5-50-20 C, 40 CFR 60.756(b)(1)&(b)(2), (c) and Conditions #7 & #18 of State Operating permit issued July 17, 2001)

10. **Periodic Monitoring** - The permittee shall perform a daily visual evaluation, Monday through Friday, when operating, except when closed for holidays, on the enclosed flare, the vaporator and the engine. If such visual observation indicates any visible emissions, the permittee shall take corrective actions to eliminate the visible emissions. If such corrective action fails to eliminate visible emissions, the permittee shall conduct a visible emissions evaluation (VEE) using 40 CFR 60, Appendix A. Method 9 for six minutes. If the six-minute VEE opacity average exceeds 10%, the VEE shall continue for an additional twelve minutes. If any of the six-minute averages during the 18 minutes exceeds 20%, the VEE shall continue for one hour from initiation, to determine compliance with the opacity limit. The permittee shall record the details of the visual emissions observations, VEE, and any corrective actions.

(9 VAC 5-80-110 E)

11. **Periodic Monitoring** - The permittee shall perform periodic visual evaluations of the candle flare once each day, Monday through Friday, when operating, except when closed for holidays, for compliance with the opacity standards for fuel burning equipment. If such periodic evaluations indicate any visible emissions, the permittee shall take appropriate action, immediately, to return the unit to normal operation such that no visible emissions exist. If such corrective action fails to eliminate visible emissions, the permittee shall conduct a visible emissions evaluation (VEE) utilizing EPA Method 22 (reference 40 CFR 60, Appendix A). If a method 22 evaluation and/or corrective action becomes necessary, the permittee shall record the details of the incident in a logbook. The logbook shall be kept on site and available for inspection by the DEQ for the most recent five year period.

(9 VAC 5-80-110 E)

C. Recordkeeping

1. The permittee shall record and maintain a log of well inspections that indicates a positive pressure had existed and the corrective action taken to alleviate the abnormal condition at the wellhead.

(9 VAC 5-80-110 and 40 CFR 60.753(b)(1))

2. **Surface Monitoring Plan** – The permittee shall develop and maintain a surface monitoring design plan that includes a topographical map with the monitoring route and the rationale for any site-specific deviations from the 30 meter intervals.
(9 VAC 5-80-110 and 40 CFR 60.753(d))
3. **Design Capacity** – The permittee shall keep for at least 5 years, current, readily accessible, on site records of the design capacity report, based on the original report, dated June 7, 1996, the current amount of waste in place, and the annual placement rates for solid waste. Off site records may be maintained if they are retrievable within 4 hours. Either paper copy or electronic formats, approved by DEQ, are acceptable.
(9 VAC 5-80-110 and 40 CFR 60.758(a))
4. The permittee shall maintain records of emission data and operating parameters as necessary to demonstrate compliance with this permit and 40 CFR 60.758. The content and format of such records shall be arranged with the Director, Tidewater Regional Office. These records shall include, but are not limited to:
 - a. The annual throughput of landfill gas to GCCS control system, calculated monthly as the sum of each consecutive 12-month period.
 - b. The annual placement of MSW in the landfill calculated monthly as the sum of each consecutive 12-month period.
 - c. All visual emissions observations and evaluations for the GCCS system: flares, engine and vaporator including the date and time of the observations, whether or not visible emissions were noted, the results of any Method 9 or Method 22 VEE's and any corrective action taken.
 - d. The latest stack test results for the control system, indicating the NMOC destruction efficiency.
 - e. The content and format of any such additional records shall be arranged with the Tidewater Regional Office. All records required by this condition and Subpart WWW (40 CFR 60.758) shall be available for inspection by the DEQ and shall be current for the most recent five years.
 - f. A copy of the July 17, 2001 permit shall be maintained on the premises of the facility to which it applies. (9 VAC 5-80-110 and Condition 27 of State Operating Permit issued July 17, 2001)
(9 VAC 5-50-410, 9 VAC 5-80-110 and 40 CFR 60.758)
5. **Operating Parameters** – The permittee shall maintain for 5 years, readily accessible continuous records of the following monitoring observations:
 - a. Wellhead gauge pressures measured monthly.

- b. Wellhead temperatures measured monthly.
 - c. Wellhead nitrogen or oxygen concentrations measured monthly.
 - d. Flow rate to the control system.
 - e. Results of quarterly surface methane monitoring.
 - f. Malfunction reports for control or collection devices.
(9 VAC 5-80-110 and 40 CFR 60.753(c) & (d) and 40 CFR 60.758(c))
6. **Collection System** - The permittee shall keep for the life of the collection system an up to date, readily accessible plot map showing each existing and planned collector in the system. This map shall also provide a unique identification location label for each collector. Additionally, the permittee shall maintain readily accessible records of the installation date and location of all newly installed collectors.
(9 VAC 5-80-110 and 40 CFR 60.758(d))
7. **Collection System** – The permittee shall maintain for 5 years, readily accessible records of all collection and control system exceedances of the operational standards, including the readings taken in later months showing a return to compliance, and the location where the exceedance occurred.
(9 VAC 5-80-110 and 40 CFR 60.758(e))
8. **Malfunction** – The permittee shall maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of the landfill gas collection and control system, any malfunction of the air pollution control equipment or any periods during which a continuous monitoring system or monitoring device is inoperative.
(9 VAC 5-80-110 and 40 CFR 60.758(c)(1))
9. The permittee shall maintain records of the required training including a statement of time, place and nature of training provided. The permittee shall have available good written operating procedures and a maintenance schedule for the combustion equipment. These procedures shall be based on the manufacturer's recommendations, at minimum. All records required by this condition shall be kept at the facility for a five year period and made available for inspection by the DEQ.
(9 VAC 5-80-110)

D. Testing

1. **Emissions Testing** - The permitted facility shall be constructed so as to allow for emissions testing at any time using appropriate methods. Upon request from the Department, test ports shall be provided at the appropriate locations.
(9 VAC 5-50-30 and 9 VAC 5-80-110)

2. **Nitrogen Testing** – If measured, the nitrogen level at each wellhead shall be determined by using Method 3C.
(9 VAC 5-80-110 and 40 CFR 60.753(c)(1))

3. **Oxygen Testing** – The oxygen level at each wellhead shall be determined by an oxygen meter using Method 3A or 3C, except for the following:
 - a. The span shall be set so that the regulatory limit is between 20 and 50 percent of the span.
 - b. A data recorder is not required.
 - c. Only a zero and a span calibration gas are required. Ambient air may be used as span.
 - d. A calibration error check is not required.
 - e. The allowable sample bias, zero drift, and calibration drift are +/- 10%.
(9 VAC 5-80-110 and 40 CFR 60.753(c)(2))

4. **Exit Velocity** – Concurrently with the visible emissions performance tests on the open flare designated P001A, the actual exit velocity of the open flare shall be determined by Reference Methods 2, 2A, 2C or 2D as appropriate; by the unobstructed (free) cross sectional area of flare tip.
(9 VAC 5-50-410 and 40 CFR 60.18(f)(3))

5. **Testing** - If testing to demonstrate compliance is conducted in addition to the monitoring specified in this permit, the permittee shall use the following methods in accordance with procedures approved by the DEQ as follows:

(Other alternative methods, as approved by the Administrator, may also be used.)

Pollutant	Test Method (40 CFR Part 60, Appendix A)
VOC	EPA Methods 18, 25, 25a
VOC Content	EPA Methods 24, 24a
NO _x	EPA Method 7
SO ₂	EPA Method 6
CO	EPA Method 10
PM/PM-10	EPA Method 5, 17
Visible Emission	EPA Method 9, 22

(9 VAC 5-80-110)

E. Reporting

1. On March 31st of each year, the permittee shall submit the GCCS report with the following information:

- a. Instances when positive pressure at a wellhead occurred due to efforts to avoid a fire. If no such instances occur, the permittee shall submit a negative report.
 - b. Value and time periods for exceedances of pressure, temperature, nitrogen or oxygen measurements at wellheads.
 - c. Any periods of control equipment malfunction exceeding one hour, including dates and the duration of the control equipment outage.
 - d. All instances when the GCCS was not operating for more than five consecutive days.
 - e. All instances where surface methane concentrations exceeded 500 ppm; the actual concentration recorded and the location on the plot plan of that exceedance.
 - f. Records of GCCS expansion, including dates, locations and equipment installed in the process of expanding the GCCS.
(9 VAC 5-50-410, 40 CFR 60.757(f) and 40 CFR 60.753(b)(1))
2. The permittee shall furnish written notification to the Director, Tidewater Regional Office of the anticipated dates of performance tests postmarked at least 30 days prior to the date of the tests.

Copies of these written notifications shall be sent to:

Chief, Air Enforcement Branch (3AT20)
U. S. Environmental Protection Agency
Region III, 1650 Arch Street
Philadelphia, Pennsylvania 19103-2029
(9 VAC 5-50-410 and 40 CFR 60.7(a))

F. Requirements for Landfill Closure

1. The GCCS may be capped or removed provided that all of the following conditions are met:
 - a. The landfill shall be a closed landfill. A closed landfill is defined as a landfill in which solid waste is no longer being placed and in which no additional solid wastes will be placed without first filing a notification of modification as prescribed in the General Provisions of 40 CFR 60. A closure report shall be submitted to the DEQ and the Administrator as provided in 40 CFR 60.757(d).
 - b. The GCCS shall have been operating for at least 15 years.

- c. The calculated NMOC gas production shall be less than 50 megagrams per year on three successive test dates. The test dates shall be no less than 90 days apart and no more than 180 days apart.

(9 VAC 5-50-410, 40 CFR 60.752(b)(2)(v) and 40 CFR 60.757(d))

2. The permittee shall calculate the NMOC emission rate for purposes of determining when the system can be removed using the following equation:

$$M_{\text{NMOC}} = 1.89 \times 10^{-3} Q_{\text{LFG}} \times C_{\text{NMOC}} \quad \text{where:}$$

M_{NMOC} = mass emission rate of NMOC, Megagrams per year

Q_{LFG} = flow rate of landfill gas, cubic meters per minute

C_{NMOC} = NMOC concentration, ppmv as hexane

- a. Q_{LFG} shall be determined by measuring the total landfill gas flow rate at the common header pipe to the control device using a gas flow measuring device calibrated according to the provisions of 40 CFR 60, Appendix A, Method 2E, Section 4 or other methods approved by the Administrator.
- b. C_{NMOC} shall be determined by collecting and analyzing landfill gas sampled from the common header pipe using Method 25C, Method 18 or any other method approved by the Administrator. The minimum list of compounds shall be those published in the most recent version of AP-42 for Method 18. The sample location on the common header shall be located upstream of any condensate removal or other refining units. The permittee shall divide the NMOC concentration (as methane) from Method 25C by six to obtain the NMOC concentration as hexane.

(9 VAC 5-50-410 and 40 CFR 60.754(b))

3. The permittee shall submit the closure report to DEQ and the Administrator within 30 days of waste acceptance cessation. DEQ may request additional information as may be necessary to verify that permanent closure has taken place in accordance with the requirements of 9 VAC 20-80-250 E & F and 40 CFR 258.60. If a closure report has been submitted to the DEQ, no additional wastes may be placed into the landfill without filing a notification of modification.

(9 VAC 5-50-410 and 40 CFR 60.757(d))

4. The permittee shall submit an equipment removal report to DEQ and the Administrator 30 days prior to removal or cessation of operation of the control equipment. The report shall contain the following:

- a. A copy of the closure report.
- b. A copy of the GCCS startup report demonstrating that the 15 year minimum control period has expired.

- c. Dated copies of 3 successive NMOC emission rate reports demonstrating the landfill is no longer producing 50 Mg or greater of NMOC per year.

DEQ may request additional information to verify that all conditions for removal have been met.

(9 VAC 5-50-410 and 40 CFR 60.757(e))

IV. Volatile Organic Compound Liquid Storage Tanks With A Capacity Greater Than 10,000 Gallons

A. Recordkeeping

The owner of each storage vessel as specified in 40 CFR 60.110B(a) shall keep readily accessible records showing the dimensions of the storage vessel and an analysis showing the capacity of the storage vessel. This record shall be kept for the life of the vessel. This condition is applicable to the following emission units: Tanks P003, Diesel Fuel Storage and P009, Leachate Storage.

(9 VAC 5-40-410, 9 VAC 5-80-110 and 40 CFR 60, Subpart Kb)

V. Facility Wide Conditions

A. Limitations

1. The opacity standard (visible emission standard) shall apply at all times except during periods of startup, shutdown and malfunction.
(9 VAC 5-50-20 A and 9 VAC 5-80-110)
2. At all times, including periods of startup, shutdown and malfunction, owners shall, to the extent practicable, maintain and operate any affected facility including associated air pollution control equipment in a manner consistent with air pollution control practices for minimizing emissions. Determination of whether acceptable operating and maintenance procedures are being used will be based on information available to the Virginia Department of Environmental Quality, which may include, but is not limited to, monitoring results, opacity observations, review of operating and maintenance procedures, and inspections of the source.
(9 VAC 5-50-20 E, 9 VAC 5-50-380, 9 VAC 5-20-180 A and 9 VAC 5-80-110)
3. In case of shutdown or bypassing, or both, of air pollution control equipment for necessary scheduled maintenance which results in excess emissions for more than one hour, the intent to shut down such equipment shall be reported to the board and local air pollution control agency, if any, at least 24 hours prior to the planned shutdown. Such prior notice shall include, but is not limited to, the following:
 - a. Identification of the specific facility to be taken out of service as well as its location and permit or registration number;

- b. The expected length of time that the air pollution control equipment will be out of service;
 - c. The nature and quantity of emissions of air pollutants likely to occur during the shutdown period; and,
 - d. Measures that will be taken to minimize the length of the shutdown or to negate the effect of the outage of the air pollution control equipment.
(9 VAC 5-50-380, 9 VAC 5-20-180 and 9 VAC 5-80-110)
4. In the event that any affected facility or related air pollution equipment fails or malfunctions in such a manner that may cause excess emissions for more than one hour, the owner shall, as soon as is practicable but no later than four daytime business hours, notify the board by facsimile transmission, telephone or telegraph of such failure or malfunction and shall within two weeks provide a written statement giving all pertinent facts, including the estimated duration of the breakdown. When the condition causing the failure or malfunction has been corrected and the equipment is again in operation, the owner shall notify the board.
(9 VAC 5-50-380, 9 VAC 5-20-180 C and 9 VAC 5-80-110)

VI. Insignificant Emission Units

The following emission units at the facility are identified in the application as insignificant emission units under 9 VAC 5-80-720:

Emission Unit No.	Emission Unit Description	Citation	Pollutant(s) Emitted (9 VAC 5-80-720 B)	Rated Capacity (9 VAC 5-80-720 C)
P004	Gasoline Storage Tank	5-80-720 B	VOC	220 gallons
P005	Crankcase Oil Storage Tank	5-80-720 B	VOC	550 gallons
P006	Hydraulic Fluid Storage Tank	5-80-720 B	VOC	550 gallons
P007	Transmission Fluid Storage Tank	5-80-720 B	VOC	550 gallons
P010	Used Oil Tank	5-80-720 B	VOC	550 gallons
P011	Diesel Fuel Tank	5-80-720 B	VOC	550 gallons
F003	Diesel Emergency Generator	5-80-720 C	CO, VOC, NO _x , SO ₂ and PM ₁₀	500 Watts
F004	Gasoline Emergency Generator	5-80-720 C	CO, VOC, NO _x , SO ₂ and PM ₁₀	0.67 HP

These emission units are presumed to be in compliance with all requirements of the federal Clean Air Act as may apply. Based on this presumption, no monitoring, recordkeeping, or reporting shall be required for these emission units in accordance with 9 VAC 5-80-110.

VII. Permit Shield & Inapplicable Requirements

Compliance with the provisions of this permit shall be deemed compliance with all applicable requirements in effect as of the permit issuance date as identified in this permit. This permit shield covers only those applicable requirements covered by terms and conditions in this permit and the following requirements which have been specifically identified as being not applicable to this permitted facility:

Citation	Title of Citation	Description of Applicability
40 CFR 60, Subpart Cc	Emission Guidelines for Control of Existing Sources: Municipal Solid Waste Landfills	This subpart is not applicable to the landfill because of recent modifications to the capacity.

Nothing in this permit shield shall alter the provisions of §303 of the federal Clean Air Act, including the authority of the administrator under that section, the liability of the owner for any violation of applicable requirements prior to or at the time of permit issuance, or the ability to obtain information by the administrator pursuant to §114 of the federal Clean Air Act, (ii) the Board pursuant to §10.1-1314 or §10.1-1315 of the Virginia Air Pollution Control Law or (iii) the Department pursuant to §10.1-1307.3 of the Virginia Air Pollution Control Law.
(9 VAC 5-80-140)

VIII. Future Applicable Requirements

A. National Emissions Standards for Hazardous Air Pollutants: [Municipal Solid Waste Landfills]

The Landfill 'MACT', published January 16, 2003, includes the following additional requirements for affected MSW landfills.

1. Those affected sources defined as 'existing landfills' shall be in compliance with the specific items included in 40 CFR Part 63, Subpart AAAA by January 16, 2004.
2. A "Startup, shutdown and malfunction" (SSM) Plan shall be developed and implemented for the facility.(40 CFR 63.6(e)(3) and 40 CFR 63.1960)
3. Annual reports of the operation of the GCCS, as required by the NSPS, Subpart 60.757(f), will be required semi-annually beginning with the first report after the compliance date of January 16, 2004.(40 CFR 63.1980)
4. Semiannual reports required by 40 CFR 63, Subpart AAAA, with respect to the SSM plan should include the following events:

- a. Each SSM event and a description of how thorough the facility complied with each item contained in the SSM Plan.
 - b. Inconsistent actions taken by the facility during an SSM event must be recorded within two working days of the event and a letter must be submitted to the Administrator within seven days of the event. Any new actions that are indicated as appropriate during an SSM event shall be incorporated in a new SSM Plan.
- (40 CFR 63.1930 through 63.1990)

IX. General Conditions

A. Federal Enforceability

All terms and conditions in this permit are enforceable by the administrator and citizens under the federal Clean Air Act, except those that have been designated as only state-enforceable.

(9 VAC 5-80-110 N)

B. Permit Expiration

This permit has a fixed term of five years. The expiration date shall be the date five years from the date of issuance. Unless the owner submits a timely and complete renewal application to the Department consistent with 9 VAC 5-80-80, the right of the facility to operate shall be terminated upon permit expiration.

1. The owner shall submit an application for renewal at least six months but no earlier than eighteen months prior to the date of permit expiration.
2. If an applicant submits a timely and complete application for an initial permit or renewal under this section, the failure of the source to have a permit or the operation of the source without a permit shall not be a violation of Article 1, Part II of 9 VAC 5 Chapter 80, until the Board takes final action on the application under 9 VAC 5-80-150.
3. No source shall operate after the time that it is required to submit a timely and complete application under subsections C and D of 9 VAC 5-80-80 for a renewal permit, except in compliance with a permit issued under Article 1, Part II of 9 VAC 5 Chapter 80.
4. If an applicant submits a timely and complete application under section 9 VAC 5-80-80 for a permit renewal, but the Board fails to issue or deny the renewal permit before the end of the term of the previous permit, (i) the previous permit shall not expire until the renewal permit has been issued or denied, and (ii) all the terms and conditions of the previous permit, including any permit shield granted pursuant to 9 VAC 5-80-140, shall remain in effect from the date the application is determined to be complete until the renewal permit is issued or denied.

5. The protection under subsections F 1 and F 5 (ii) of section 9 VAC 5-80-80 F shall cease to apply if, subsequent to the completeness determination made pursuant to section 9 VAC 5-80-80 D, the applicant fails to submit, by the deadline specified in writing by the Board, any additional information identified as being needed to process the application.
(9 VAC 5-80-80 B, C and F, 9 VAC 5-80-110 D and 9 VAC 5-80-170 B)

C. Recordkeeping and Reporting

1. All records of monitoring information maintained to demonstrate compliance with the terms and conditions of this permit shall contain, where applicable, the following:
 - a. The date, place as defined in the permit, and time of sampling or measurements.
 - b. The date(s) analyses were performed.
 - c. The company or entity that performed the analyses.
 - d. The analytical techniques or methods used.
 - e. The results of such analyses.
 - f. The operating conditions existing at the time of sampling or measurement.
(9 VAC 5-80-110 F)
2. Records of all monitoring data and support information shall be retained for at least 5 years from the date of the monitoring sample, measurement, report, or application. Support information includes all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by the permit.
(9 VAC 5-80-110 F)
3. The permittee shall submit the results of monitoring contained in any applicable requirement to DEQ no later than March 1 and September 1 of each calendar year. This report must be signed by a responsible official, consistent with 9 VAC 5-80-80 G, and shall include:
 - a. The time period included in the report. The time periods to be addressed are January 1 to June 30 and July 1 to December 31.
 - b. All deviations from permit requirements. For purposes of this permit, deviations include, but are not limited to:
 - (1) Exceedance of emissions limitations or operational restrictions;
 - (2) Excursions from control device operating parameter requirements, as documented by continuous emission monitoring, periodic monitoring, or compliance assurance monitoring which indicates an exceedance of emission limitations or operational restrictions; or,
 - (3) Failure to meet monitoring, recordkeeping, or reporting requirements contained in this permit.

- c. If there were no deviations from permit conditions during the time period, the permittee shall include a statement in the report that “no deviations from permit requirements occurred during this semi-annual reporting period.”

(9 VAC 5-80-110 F)

D. Annual Compliance Certification

Exclusive of any reporting required to assure compliance with the terms and conditions of this permit or as part of a schedule of compliance contained in this permit, the permittee shall submit to EPA and DEQ no later than March 1 each calendar year, a certification of compliance with all terms and conditions of this permit including emission limitation standards or work practices. The compliance certification shall comply with such additional requirements that may be specified pursuant to §114(a)(3) and §504(b) of the federal Clean Air Act. This certification shall be signed by a responsible official, consistent with 9 VAC 5-80-80 G, and shall include:

1. The time period included in the certification. The time period to be addressed is January 1 to December 31.
2. The identification of each term or condition of the permit that is the basis of the certification.
3. The compliance status.
4. Whether compliance was continuous or intermittent, and if not continuous, documentation of each incident of non-compliance.
5. Consistent with subsection 9 VAC 5-80-110 E, the method or methods used for determining the compliance status of the source at the time of certification and over the reporting period.
6. Such other facts as the permit may require to determine the compliance status of the source.

One copy of the annual compliance certification shall be sent to EPA at the following address:

Clean Air Act Title V Compliance Certification (3AP00)
U. S. Environmental Protection Agency, Region III
1650 Arch Street
Philadelphia, PA 19103-2029

(9 VAC 5-80-110 K.5)

E. Permit Deviation Reporting

The permittee shall notify the Director, Tidewater Regional Office, within 4 daytime business hours of any deviations from permit requirements which may cause excess emissions for more than one hour, including those attributable to upset conditions as may be defined in this permit. In addition, within 14 days of the occurrence, the permittee shall provide a written statement explaining the problem, any corrective actions or preventative measures taken, and the estimated duration of the permit deviation. The occurrence should also be reported in the next semi-annual compliance monitoring report pursuant to General Condition VIII.C.3. of this permit.
(9 VAC 5-80-110 F.2 and 9 VAC 5-80-250)

F. Failure/Malfunction Reporting

In the event that any affected facility or related air pollution control equipment fails or malfunctions in such a manner that may cause excess emissions for more than one hour, the owner shall, as soon as it is practicable, but no later than four daytime business hours, notify the Director, Tidewater Regional Office by facsimile transmission, telephone, telegraph or electronic means of the discovery of such failure or malfunction, and shall within two weeks provide a written statement giving all pertinent facts, including the estimated duration of the breakdown. Owners subject to the requirements of 9 VAC 5-40-50 C and 9 VAC 5-50-50 C are not required to provide the written statement prescribed in this paragraph for facilities subject to the monitoring requirements of 9 VAC 5-40-40 and 9 VAC 5-50-40. When the condition causing the failure or malfunction has been corrected and the equipment is again in operation, the owner or operator shall notify the Director, Tidewater Regional Office.
(9 VAC 5-20-180 C)

G. Severability

The terms of this permit are severable. If any condition, requirement or portion of the permit is held invalid or inapplicable under any circumstance, such invalidity or inapplicability shall not affect or impair the remaining conditions, requirements, or portions of the permit.
(9 VAC 5-80-110 G.1)

H. Duty to Comply

The permittee shall comply with all terms and conditions of this permit. Any permit noncompliance constitutes a violation of the federal Clean Air Act or the Virginia Air Pollution Control Law or both and is grounds for enforcement action; for permit termination, revocation and reissuance, or modification; or, for denial of a permit renewal application.
(9 VAC 5-80-110 G.2)

I. Need to Halt or Reduce Activity not a Defense

It shall not be a defense for a permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of this permit.

(9 VAC 5-80-110 G.3)

J. Permit Action for Cause

1. This permit may be modified, revoked, reopened, and reissued, or terminated for cause as specified in 9 VAC 5-80-110 L, 9 VAC 5-80-240 and 9 VAC 5-80-260. The filing of a request by the permittee for a permit modification, revocation and reissuance, or termination, or of a notification of planned changes or anticipated noncompliance does not stay any permit condition.
(9 VAC 5-80-110 G & L, 9 VAC 5-80-240 and 9 VAC 5-80-260)
2. Such changes that may require a permit modification and/or revisions include, but are not limited to, the following:
 - a. Erection, fabrication, installation, addition, or modification of an emissions unit (which is the source, or part of it, which emits or has the potential to emit any regulated air pollutant), or of a source, where there is, or there is potential of, a resulting emissions increase;
 - b. Reconstruction or replacement of any emissions unit or components thereof such that its capital cost exceeds 50% of the cost of a whole new unit;
 - c. Any change at a source which causes emission of a pollutant not previously emitted, an increase in emissions, production, throughput, hours of operation, or fuel use greater than those allowed by the permit, or by 9 VAC 5-80-11, unless such an increase is authorized by an emissions cap; or any change at a source which causes an increase in emissions resulting from a reduction in control efficiency, unless such an increase is authorized by an emissions cap;
 - d. Any reduction of the height of a stack or of a point of emissions, or the addition of any obstruction which hinders the vertical motion of exhaust;
 - e. Any change at the source which affects its compliance with conditions in this permit, including conditions relating to monitoring, recordkeeping, and reporting;
 - f. Addition of an emissions unit which qualifies as insignificant by emissions rate (9 VAC 5-80-720 B) by size or by production rate (9 VAC 5-80-720 C);
 - g. Any change in insignificant activities, as defined by 9 VAC 5-80-90 D.1.a(1) and 9 VAC 5-80-720 B and 9 VAC 5-80-720 C.

(9 VAC 5-80-110 G, 9 VAC 5-80-110 J, 9 VAC 5-80-240, and 9 VAC 5-80-260)

K. Property Rights

The permit does not convey any property rights of any sort, or any exclusive privilege.
(9 VAC 5-80-110 G.5)

L. Duty to Submit Information

1. The permittee shall furnish to the Board, within a reasonable time, any information that the Board may request in writing to determine whether cause exists for modifying, revoking and reissuing, or terminating the permit or to determine compliance with the permit. Upon request, the permittee shall also furnish to the Board copies of records required to be kept by the permit and, for information claimed to be confidential, the permittee shall furnish such records to the Board along with a claim of confidentiality.
(9 VAC 5-80-110 G.6)
2. Any document (including reports) required in a permit condition to be submitted to the Board shall contain a certification by a responsible official that meets the requirements of 9 VAC 5-80-80 G.
(9 VAC 5-80-110 K.1)

M. Duty to Pay Permit Fees

The owner of any source for which a permit under 9 VAC 5-80-50 through 9 VAC 5-80-300 was issued shall pay permit fees consistent with the requirements of 9 VAC 5-80-310 through 9 VAC 5-80-350. The actual emissions covered by the permit program fees for the preceding year shall be calculated by the owner and submitted to the Department by **April 15** of each year. The calculations and final amount of emissions are subject to verification and final determination by the Department.
(9 VAC 5-80-110 H and 9 VAC 5-80-340 C)

N. Fugitive Dust Emission Standards

During the operation of a stationary source or any other building, structure, facility, or installation, no owner or other person shall cause or permit any materials or property to be handled, transported, stored, used, constructed, altered, repaired, or demolished without taking reasonable precautions to prevent particulate matter from becoming airborne. Such reasonable precautions may include, but are not limited to, the following:

1. Use, where possible, of water or chemicals for control of dust in the demolition of existing buildings or structures, construction operations, the grading of roads, or the clearing of land;
2. Application of asphalt, water, or suitable chemicals on dirt roads, materials stockpiles, and other surfaces which may create airborne dust; the paving of roadways and the maintaining of them in a clean condition;

3. Installation and use of hoods, fans, and fabric filters to enclose and vent the handling of dusty material. Adequate containment methods shall be employed during sandblasting or other similar operations;
4. Open equipment for conveying or transporting material likely to create objectionable air pollution when airborne shall be covered or treated in an equally effective manner at all times when in motion; and,
5. The prompt removal of spilled or tracked dirt or other materials from paved streets and of dried sediments resulting from soil erosion.

(9 VAC 5-40-90 and 9 VAC 5-50-90)

O. Startup, Shutdown, and Malfunction

At all times, including periods of startup, shutdown, soot blowing, and malfunction, owners shall, to the extent practicable, maintain and operate any affected facility including associated air pollution control equipment in a manner consistent with air pollution control practices for minimizing emissions. Determination of whether acceptable operating and maintenance procedures are being used will be based on information available to the Board, which may include, but is not limited to, monitoring results, opacity observations, review of operating and maintenance procedures, and inspection of the source.

(9 VAC 5-50-20)

P. Alternative Operating Scenarios

Contemporaneously with making a change between reasonably anticipated operating scenarios identified in this permit, the permittee shall record in a log at the permitted facility a record of the scenario under which it is operating. The permit shield described in 9 VAC 5-80-140 shall extend to all terms and conditions under each such operating scenario. The terms and conditions of each such alternative scenario shall meet all applicable requirements including the requirements of 9 VAC 5 Chapter 80, Article 1.

(9 VAC 5-80-110 J)

Q. Inspection and Entry Requirements

The permittee or co-operator shall allow DEQ, upon presentation of credentials and other documents as may be required by law, to perform the following:

1. Enter upon the premises where the source is located or emissions-related activity is conducted, or where records must be kept under the terms and conditions of the permit.
2. Have access to and copy, at reasonable times, any records that must be kept under the terms and conditions of the permit.

3. Inspect at reasonable times any facilities, equipment (including monitoring and air pollution control equipment), practices, or operations regulated or required under the permit.
4. Sample or monitor at reasonable times substances or parameters for the purpose of assuring compliance with the permit or applicable requirements.

(9 VAC 5-80-110 K.2)

R. Reopening For Cause

The permit shall be reopened by the Board if additional federal requirements become applicable to a major source with a remaining permit term of three years or more. Such reopening shall be completed no later than 18 months after promulgation of the applicable requirement. No such reopening is required if the effective date of the requirement is later than the date on which the permit is due to expire, unless the original permit or any of its terms and conditions has been extended pursuant to 9 VAC 5-80-80 F.

1. The permit shall be reopened if the Board or the administrator determines that the permit contains a material mistake or that inaccurate statements were made in establishing the emissions standards or other terms or conditions of the permit.
2. The permit shall be reopened if the administrator or the Board determines that the permit must be revised or revoked to assure compliance with the applicable requirements.
3. The permit shall not be reopened by the Board if additional applicable state requirements become applicable to a major source prior to the expiration date established under 9 VAC 5-80-110 D.

(9 VAC 5-80-110 L)

S. Permit Availability

Within five days after receipt of the issued permit, the permittee shall maintain the permit on the premises for which the permit has been issued and shall make the permit immediately available to DEQ upon request.

(9 VAC 5-80-150 E)

T. Transfer of Permits

1. No person shall transfer a permit from one location to another, unless authorized under 9 VAC 5-80-130, or from one piece of equipment to another.

(9 VAC 5-80-160)

2. In the case of a transfer of ownership of a stationary source, the new owner shall comply with any current permit issued to the previous owner. The new owner shall notify the Board of the change in ownership within 30 days of the transfer and shall comply with the requirements of 9 VAC 5-80-200.
(9 VAC 5-80-160)
3. In the case of a name change of a stationary source, the owner shall comply with any current permit issued under the previous source name. The owner shall notify the Board of the change in source name within 30 days of the name change and shall comply with the requirements of 9 VAC 5-80-200.
(9 VAC 5-80-160)

U. Malfunction as an Affirmative Defense

1. A malfunction constitutes an affirmative defense to an action brought for noncompliance with technology-based emission limitations if the conditions of paragraph 2 are met.
2. The affirmative defense of malfunction shall be demonstrated by the permittee through properly signed, contemporaneous operating logs, or other relevant evidence that show the following:
 - a. A malfunction occurred and the permittee can identify the cause or causes of the malfunction.
 - b. The permitted facility was at the time being properly operated.
 - c. During the period of malfunction, the permittee took all reasonable steps to minimize levels of emissions that exceeded the emissions standards or other requirements in the permit.
 - d. The permittee notified the board of the malfunction within two working days following the time when the emissions limitations were exceeded due to the malfunction. This notification shall include a description of the malfunction, any steps taken to mitigate emissions, and corrective actions taken. The notification may be delivered either orally or in writing. The notification may be delivered by electronic mail, facsimile transmission, telephone, telegraph, or any other method that allows the permittee to comply with the deadline. The notice fulfills the requirement of 9 VAC 5-80-110 F.2. b to report promptly deviations from permit requirements. This notification does not release the permittee from the malfunction reporting requirements under 9 VAC 5-20-180 C.
3. In any enforcement proceeding, the permittee seeking to establish the occurrence of a malfunction shall have the burden of proof. The provisions of this section are in addition to any malfunction, emergency or upset provision contained in any requirement applicable to the source.
4. The provisions of this section are in addition to any malfunction, emergency or upset provision contained in any applicable requirement.

(9 VAC 5-80-250)

V. Permit Revocation or Termination for Cause

A permit may be revoked or terminated prior to its expiration date if the owner knowingly makes material misstatements in the permit application or any amendments thereto or if the permittee violates, fails, neglects or refuses to comply with the terms or conditions of the permit, any applicable requirements, or the applicable provisions of 9 VAC 5 Chapter 80 Article 1. The Board may suspend, under such conditions and for such period of time as the Board may prescribe, any permit for any of the grounds for revocation or termination or for any other violations of these regulations.
(9 VAC 5-80-260)

W. Duty to Supplement or Correct Application

Any applicant who fails to submit any relevant facts or who has submitted incorrect information in a permit application shall, upon becoming aware of such failure or incorrect submittal, promptly submit such supplementary facts or corrections. An applicant shall also provide additional information as necessary to address any requirements that become applicable to the source after the date a complete application was filed but prior to release of a draft permit.
(9 VAC 5-80-80 E)

X. Stratospheric Ozone Protection

If the permittee handles or emits one or more Class I or II substances subject to a standard promulgated under or established by Title VI (Stratospheric Ozone Protection) of the federal Clean Air Act, the permittee shall comply with all applicable sections of 40 CFR Part 82, Subparts A to F.
(40 CFR Part 82, Subparts A-F)

Y. Accidental Release Prevention

If the permittee has more, or will have more than a threshold quantity of a regulated substance in a process, as determined by 40 CFR 68.115, the permittee shall comply with the requirements of 40 CFR Part 68.
(40 CFR Part 68)

Z. Changes to Permits for Emissions Trading

No permit revision shall be required under any federally approved economic incentives, marketable permits, emissions trading and other similar programs or processes for changes that are provided for in this permit.
(9 VAC 5-80-110 I)

AA. Emissions Trading

Where the trading of emissions increases and decreases within the permitted facility is to occur within the context of this permit and to the extent that the regulations provide for trading such increases and decreases without a case-by-case approval of each emissions trade:

1. All terms and conditions required under 9 VAC 5-80-110, except subsection N, shall be included to determine compliance.
2. The permit shield described in 9 VAC 5-80-140 shall extend to all terms and conditions that allow such increases and decreases in emissions.
3. The owner shall meet all applicable requirements including the requirements of 9 VAC 5-80-50 through 9 VAC 5-80-300.
(9 VAC 5-80-110 I)

X. State-Only Enforceable Requirements

The following terms and conditions are not required under the federal Clean Air Act or under any of its applicable federal requirements, and are not subject to the requirements of 9 VAC 5-80-290 concerning review of proposed permits by EPA and draft permits by affected states.

1. 9 VAC 5 Chapter 50, Part II, Article 2: Standards of Performance for Odorous Emissions
(former Rule 5-2)
2. 9 VAC Chapter 50, Part II, Article 3: Standards of Performance for Toxic Pollutants
(former Rule 5-3)

(9 VAC 5-80-110 N and 9 VAC 5-80-300)

Re: **TITLE V ANNUAL COMPLIANCE CERTIFICATION**

Date:

Please find attached our Title V Annual Compliance Certification for the period from ____/____/____ to ____/____/____. It identifies each term or condition of the permit that is the basis of the certification. All deviations and periods of non-compliance for the period have been addressed in semi-annual monitoring reports that have either been previously submitted or are enclosed.

Certification: I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering and evaluating the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

Re: PROMPT DEVIATION REPORT – Pursuant to Title V Permit

Date:

This confirms the deviation reported to the Regional Office at _____ o'clock on ____/____/____. The details are described below. The deviation may have caused excess emissions for more than one hour, consistent with specified averaging times. None of these deviations were related to a malfunction.

Start date & time:	End date & time:	Estimated Duration:
Deviation from which permit condition (<i>condition number and brief description</i>):		
Description of incident (<i>including emission unit affected</i>):		
Description of Monitoring Requirement for affected unit(s):		
Probable cause:		
Description of corrective measures taken (<i>demonstrating a timely & appropriate response</i>):		
Description of preventive measures taken:

Re: SEMI-ANNUAL MONITORING REPORT – Pursuant to Title V Permit

Date:

The following monitoring report is submitted as required by our Title V permit. For the purposes of this report, deviation means (1) exceedances of emission limits, as determined by such means as stack testing, continuous emission monitors, parametric monitoring and EPA Method 9 visible emission evaluations; (2) excursions from control device operating parameter requirements such as afterburner temperature, scrubber flow rate, baghouse pressure drop; (3) excursions from operational restrictions things such as throughput, fuel quality, and coating VOC and HAP content; and (4) failure to meet monitoring, record keeping or reporting requirements. The report addresses all data points, which are above a standard, limit etc, according to the averaging period, if any, specified in the permit. If no averaging period is specified in the permit, then any monitored reading is considered a deviation to be reported. Deviations are reported regardless of whether they may have caused excess emissions or whether they were the result of a malfunction.

The period covered by the report is from ____/____/____ to ____/____/____.

During the reporting period:

- ☐ No deviations from permit requirements occurred during this semi-annual reporting period. (We conducted all required monitoring and associated record keeping and reporting. Required monitoring revealed no deviations from permit requirements.)
- ☐ We failed to conduct required monitoring/record keeping/reporting as explained on the attached form.
- ☐ We identified deviations as a result of required monitoring:
- ☐ Deviations were addressed in CEM Excess Emission Report(s) dated: _____
- ☐ Deviations were addressed in Fuel Report(s) dated: _____
- ☐ Deviations were addressed in MACT Report(s) dated: _____
- ☐ Deviations due to malfunctions were addressed in letters dated: _____
- ☐ Deviations were addressed in other report(s) dated: _____
- Type of report: _____
- ☐ Deviations were previously described in Prompt Deviation Reports dated:
- _____
- _____
- _____
- _____
- _____
- ☐ "Other" deviations, which were not previously reported, are described in the attachment.

Certification: I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering and evaluating the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.
